

June 17, 2020

We are very excited to announce that we will be able to provide some outdoor visitation for residents and family members. Our goal is to provide one visit per resident per week. There are very strict criteria for these visits and they must be supervised so they need to be limited right now. We will begin calling family members Thursday to start making appointments beginning on Friday. The visits will be 30 minutes long. Please see the following bullet points outlining the details of these visits.

- The visits will take place under the Easy Ups near the Lodge entrance. There will be two designated parking spaces that will be marked for visitor parking that are the closest parking spaces to the Lodge Entrance.
- When you are called to set up an appointment for a visit you will be pre-screened with health and travel questions. You will be screened again at the time of the visit. Those who do not meet the health screening criteria, or who have traveled within the previous 14 days out of the country, or within the USA by public transportation to include; plane, train, bus or who have traveled to a location with an increasing number of COVID 19 cases will be asked to postpone their visit.
- Children under 12 are excluded from visiting. Pets will not be allowed to visit.
- A staff member will supervise every visit to ensure that there is at least 6 feet of physical distancing between the resident and their visitor.
- The environment will be thoroughly cleaned prior to and after each visit.
- Visits must be scheduled in advance and are dependent on permissible weather conditions.
- Water will be provided to maintain hydration for residents and visitors.
- No more than two guests per visitation.
- Visitors and residents must wear a mask at all times during the visit.
- Surgical masks will be provided to visitors prior to entering the visitation area with instruction to cover nose and mouth until they are out of the visitor area. Residents will be given a surgical mask prior to leaving their room.
- When the visitor arrives they should call the main number to let us know that they have arrived.
- The visitor will be screened and if there are no issues during the screening process a staff member will accompany the guests to the designated visitor location.
- Visitor logs will be maintained with contact tracing should it be needed.
- Both resident and visitors must wear masks at all times during the visit, and perform hand hygiene before, after and during the visit if they touch their face or mask.

- Visitors must maintain a distance of 6 feet at all times during the visit.
- Residents and visitors must be screened for symptoms of COVID 19 before the visitation occurs by asking about the following symptoms:
- Fever >100 F or feeling feverish. Respiratory symptoms such as runny nose, congestion, sore throat, cough or shortness of breath. Whole body symptoms such as chills, muscle aches, and severe fatigue. New GI symptoms such as nausea, vomiting or diarrhea. Changes in taste or smell.

We will be calling each resident's main family member to start scheduling these visits. We are very happy to provide you with this opportunity at this time. Please let us know if you have any questions and please note that we will only be able to provide one visit per resident per week to start.

We will continue to keep you updated as time goes on.

God bless,

Brenda Buttrick RN, LNHA
Administrator
