October 30, 2020

Dear Residents and Family Members,

I am writing to give you an update on what is happening here at St. Francis. We currently have a total of four staff members who are out with cold symptoms. They are all out of the building on quarantine and they have all been tested and we are waiting for their test results to return. We also tested 10% of our employees per the new guidelines from the NH Public Health Department yesterday. We are also waiting for those test results. St. Francis is currently considered in Phase 1 of the NH Public Health guidelines because the amount of positive cases has gone up in Belknap County and the county is considered in moderate transmission. We were able to have our hairdresser return this week. On Wednesday, October 7 we started indoor social visits for residents and family members. These are socially distanced and supervised using the same protocols as the outside visits for now. In addition to this we have been given some guidance to allow more family members compassionate care visits. We will be reaching out to family members for these visits in the near future. Please note you will be asked to wear full PPE (personal protective equipment) for these compassionate care visits.

You can call Mindy at ext. 330 to schedule the indoor family visits. We are continuing with our virtual visits as well as some window visits. You can reach Cindy at ext. 313 to schedule these visits.

We are very excited about a Halloween event that we have planned coming up on Saturday, October 31. Please be sure to RSVP to Alex Cave our Life Enrichment Director for this event and you can reach her at ext. 338 with any questions.

I know that the holiday time is approaching and I want you all to be thinking about the fact that this year's holidays will be very different for our residents than other years. We are starting to formulate some ideas of how we can connect families more perhaps virtually and will be writing more about this in upcoming letters.

Please note that when a resident leaves the facility for an emergency room visit we are placing the resident in a 14 day quarantine room which is a private room on our Lodge wing. This also applies to some doctor's visits depending on how the resident is transported and if the resident is able to keep their mask on during the appointment. The purpose for this is to avoid any potential exposure to others. We are trying to be as cautious as possible because we know that COVID 19 can spread very easily.

I also want to remind you that we are prohibiting any non-essential items to come in to the residents as we know that the virus can live on objects for a short period of time and do not want to take the chance that it could be spread in this way. All laundry will be done by our laundry staff here. If there is an essential item that you would like to bring for your loved one it needs to be in a sealed container that we can disinfect and leave in our entry way for a period of time before bringing in the facility. We are accepting floral deliveries. We will be cleaning and wiping down the vases.

We continue using surgical masks for our residents. The NH Public Health Department has requested that masks be used on our residents while we are providing care for them and when they are out of their rooms. The purpose of the masks is to have all of us keep our germs to ourselves. We are learning more about this virus and we know that it can be spread to others without showing any symptoms.

I would like to remind you to please continue to wear your masks when you are in public and to practice social distancing. This is so important for your own safety as well as the safety of your families. We need to be the examples for others. Thank you very much.

While we know this is an incredibly challenging time for you and your family, please be assured that we remain committed to the care and support of your loved one here at St. Francis. Their safety, health and well-being remain our firm commitment.

We will continue to keep you updated as time goes on.

God bless,

Brenda Buttrick RN, LNHA

Administrator
