December 11, 2020

I am writing to give you an update on what is happening here at St. Francis. Last week we tested 100% of our employees and they all came back negative. This week we have tested 100% of our employees. We are waiting on the test results for these. This is being done per the NH Public Health guidelines. St. Francis is currently considered in Phase 1 of the NH Public Health guidelines because the amount of positive cases has gone up in Belknap County and the county is considered in substantial transmission. This week the positivity rate went to 10.5% which caused us to close to any indoor visitation. This is because CMS (Centers for Medicare and Medicaid) have given guidance that if the positivity rate goes above 10% then we must close to indoor visitation. Per the CMS guidelines we will be moving to testing our employees twice per week beginning next week.

We would like to encourage you to continue with virtual visits and with window visits. We are working on providing a structure with some heat in it for the window visits. We should have this ready by the end of next week. We want to make it as comfortable and personal as possible to have the window visits. We will begin to schedule these also. Please call Mindy at ext. 330 to schedule window visits with your family member. You can reach Laura or Cindy at ext. 313 for virtual visits.

Please note that when a resident leaves the facility for an emergency room visit we are placing the resident in a 14 day quarantine room which is a private room on our Lodge wing. This now applies to all doctor's visits due to the high positivity rate in the community. The purpose for this is to avoid any potential exposure to others. We are trying to be as cautious as possible because we know that COVID 19 can spread very easily. Due to being in phase 1 and the substantial transmission in the community we are limiting the outside doctor's appointments for residents to those things that are very essential only. We have been postponing some doctor's office visits at this time.

I also want to remind you that we are prohibiting any non-essential items to come in to the residents as we know that the virus can live on objects for a short period of time and do not want to take the chance that it could be spread in this way. All laundry will be done by our laundry staff here. If there is an essential item that you would like to bring for your loved one it needs to be in a sealed container that we can disinfect and leave in our entry way for a period of time before bringing in the facility. We are accepting floral deliveries. We will be cleaning and wiping down the vases. We are working on a plan for residents to receive Christmas gifts. We would like you to bring these gifts in by December 16 and they will be put in storage so that they can be opened Christmas day or Christmas week. This will allow time to make sure that there is no virus on the packages by the time your loved ones receive them. We are also looking for donations for Christmas cards so that we can help the residents send out their own Christmas cards to friends and family. We are also encouraging you to decorate the outside of your loved ones' windows with Christmas decorations of your choice.

I would like to schedule a zoom meeting with any family members who would like to participate to provide more communication and feedback. Please e-mail me back if you have interest in a zoom meeting and what would be good for a date and time for the meeting.

Please note that we are preparing for the Covid 19 vaccine to arrive at some point in the near future. We understand that residents of nursing homes and health care workers will be among those that are the first to be offered the vaccine. We are hearing more about the vaccines coming and hoping to get more information to you soon. Our Assistant Director of Nursing will be sending you consent forms for those residents who have activated DPOAs. At this point we are unsure of the brand name of the vaccine but we know that both will require 2 injections 21 days apart. There will be two consent forms sent and both will need to be signed to consent to both injections. Please see the second attachment from Walgreens regarding more information on the vaccine. There is a link at the bottom which will lead you to a video with more information.

We continue using surgical masks for our residents. The NH Public Health Department has requested that masks be used on our residents while we are providing care for them and when they are out of their rooms. The purpose of the masks is to have all of us keep our germs to ourselves. We are learning more about this virus and we know that it can be spread to others without showing any symptoms.

I would like to remind you to please continue to wear your masks when you are in public and to practice social distancing. This is so important for your own safety as well as the safety of your families. We need to be the examples for others. Thank you very much.

While we know this is an incredibly challenging time for you and your family, please be assured that we remain committed to the care and support of your loved one here at St. Francis. Their safety, health and well-being remain our firm commitment.

We will continue to keep you updated as time goes on.

God bless,

Brenda Buttrick RN, LNHA
Administrator

COVID-19 Vaccine What to Expect

Your trusted immunizer

Our patients have given us a consistently high satisfaction rating for our expertise, courtesy and friendliness throughout the Walgreens vaccination experience.¹ Since 2010, we've administered 60 million immunizations. And today, we continue to pave the way for pharmacy immunization services and more — rest assured, you're in great hands.

Keeping you healthy, safely

With Walgreens, your safety always comes first. We're thoroughly following the CDC recommendation for social distancing and PPE. Here's what you can expect to do when getting your vaccine:

- View vaccine safety information
- Complete applicable paperwork
- Participate in eligibility screening
- Receive your vaccination
- Take part in a 15-minute safety observation following your vaccination
