Dear Residents, Tenants, Family Members and Employees,

I am writing to you to give you an update on things that are happening at St. Francis. We have completed our first round of testing and we are waiting on some of the results from the public health lab. We do have two employees who have tested positive for Covid 19. They did not have exposure to each other and the second employee has not exposed any of our residents or employees as she has not been working. We should be receiving the results on these tests by the beginning of this week and we will be doing a second round of testing on Monday and Tuesday of this coming week. We have been in contact with the NH Public Health Department and Catholic Charities. NH Public Health Department has stated that we need to do two rounds of Covid 19 PCR testing. The newest guidance states that we can test employees and residents who had close contact with the positive employee. We will let you know the results of these tests as soon as we have them. We will not have community dining or activities during this time while we are testing for the next 7-12 days or so. Our family visitation needs to be done in a limited way over this period of time. We have been directed that compassionate care visits may continue but need to be done in a limited way. They cannot be done as a routine. Some examples of why they can be offered are; to help a resident when they are first admitted to help them adjust to their new environment, to be with a resident who is terminally ill and close to the end of life, to console a resident who shows signs of depression or anxiety. Please continue to call Diane at ext. 300 to schedule your visits and keep in mind the guidelines that we have. You may also reach us to schedule window visits or electronic visits. Brandy can help with this at ext. 313 or Alex at ext. 338. We will be wearing N95 masks and face shields. These test samples will be sent out to the NH Public Health lab. Based on test results they will give us further guidance on how to proceed. We will keep you updated with any changes that happen.

I have had several ask me questions about the vaccine booster. At this time, I do not have much information to relay about the booster but I am sure I will in the coming weeks and I will keep you informed as I learn more about it and when we might offer it to our residents and employees.

The positivity rate of Covid 19 is going up in our county. Belknap County is considered in substantial transmission. I would like to encourage you all to wear masks when you are in a public setting. This applies even to vaccinated people due to the different variants and the break through cases that are being discovered.

While we know this is an incredibly challenging time for you and your family, please be assured that we remain committed to the care and support of your loved one here at St. Francis. Their safety, health and well-being remain our firm commitment.

We will continue to keep you updated as time goes on.

God bless,

Brenda Buttrick RN, LNHA
