November 5, 2021

Dear Residents, Tenants, Family Members and Employees,

I am writing to you to give you an update on things that are happening at St. Francis. I regret to inform you that this morning we had another employee who tested positive after she stated that she was not feeling well. The employee is vaccinated and always wears a mask and eye wear during working hours. We have been in contact with the NH Public Health Department and Catholic Charities. NH Public Health Department has stated that we need to do two rounds of Covid 19 PCR testing. We are planning to do the PCR tests this coming Sunday and Monday and then will repeat this testing and will let you know the results of these tests as soon as we have them. With these two rounds of testing we have decided to test all of the residents and employees. We will not have community dining or activities during this time while we are testing for the next 14 days or so. Our family visitation needs to be done in a limited way over this period of time. We have been directed that compassionate care visits may continue but need to be done in a limited way. They cannot be done as a routine. Some examples of why they can be offered are; to help a resident when they are first admitted to help them adjust to their new environment, to be with a resident who is terminally ill and close to the end of life, to console a resident who shows signs of depression or anxiety. We want to make sure we are offering all of our residents compassionate care visits as we realize that this has been an extended period of time. Please continue to call Diane at ext. 300 to schedule your visits and keep in mind the guidelines that we have. You may also reach us to schedule window visits or electronic visits. Alex can help with this at ext. 338. We will continue wearing N95 masks and face shields. These test samples will be sent out to the NH Public Health lab. Based on test results they will give us further guidance on how to proceed. We will keep you updated with any changes that happen.

I have had several ask me questions about the vaccine booster. We have a tentative date of November 24 for a vaccine clinic. This will be done through Walgreens pharmacy.

The positivity rate of Covid 19 is going up in our county. Belknap County is considered in substantial transmission. I would like to encourage you all to wear masks when you are in a public setting. This applies even to vaccinated people due to the different variants that are being discovered.

While we know this is an incredibly challenging time for you and your family, please be assured that we remain committed to the care and support of your loved one here at St. Francis. Their safety, health and well-being remain our firm commitment.

We will continue to keep you updated as time goes on.
God bless,

Brenda Buttrick RN, LNHA
Administrator
